Execute script on the host at unit start or stop

16 Jun 2022

Execute a script on the GL Host at start by creating file Pre Unit start `host-start.sh` Post Unit start `host-startACS.sh` Execute a script on the GL Host at stop by creating file `host-stop.sh` within the unit's service directory (Example, `/var/glitch-units/myunit/service/host-start.sh`) Both files should have execute permissions `chmod +x host-start.sh`
