GLServer Clone Unit

23 Jun 2022

Clone a unit using the following command `gl --cloneu unit_name` The clone feature via the Webui interface differs and offers the ability to execute pre and post clone scripting. Pre/Post clone scripts can be .sh (bash script) or .php (PHP file) and should be placed into the following directory. `/var/unit_dir/unit_name/glitch/` The accepted filenames are `pre-clone.sh` `post-clone.sh` `pre-clone.php` `post-clone.php`
